A young boy with short brown hair, wearing a light blue polo shirt and dark pants, is kneeling on the left side of the frame. He is looking intently at a large sea turtle swimming in a clear, greenish-blue aquarium tank. The turtle is positioned on the right side of the frame, facing left towards the boy. The turtle's head and front flippers are visible, and it appears to be swimming slowly. The background is a soft, out-of-focus green, suggesting the water in the tank.

SEA TURTLE RECOVERY

SPRING 2017 / VOLUME 59

From the President

It all started with a phone call from the South Carolina Department of Natural Resources back in 2000.

A loggerhead sea turtle had washed ashore, sick and incapacitated, and the nearest sea turtle rehab facility was several hours away. Could we help? Our curator at the time, Jason Crichton, said sure – and immediately shot over to Kmart to pick up a kiddie pool.

Little did we know at the time that this turtle, affectionately named Stinky, would transform the future of the South Carolina Aquarium. Stinky was released, healthy and thriving, almost a year later and based on our experience we readily welcomed other stranded sea turtles into our care.

With a “Field of Dreams” fervor, we purchased hospital tanks and life support, staffed up with biologists and volunteers, added a veterinary care team and sophisticated medical technology. While this didn’t happen overnight, we learned several things along the way ... including how resilient sea turtles are, and also how little we know about them ... how threatened they are by human pressures, and how our changing environment is conspiring against them.

We also learned how powerfully sea turtles tug at our hearts, and what effective ambassadors they can be for all of marine wildlife.

That’s why we are so excited to unveil Zucker Family Sea Turtle Recovery™ on May 27. This dramatic new facility will not only greatly expand our ability to treat sea turtles, it will enable all of our visiting public to see firsthand the care and attention our patients receive. It will serve as a powerful learning landscape, where children can interact with augmented reality to conduct diagnoses on mock sea turtles based on actual case histories. It will also extend our leadership in global sea turtle care, as we engage in cutting-edge research to learn more about these endangered species and how we can save them.

Most of all, it will offer hope – hope that we can make a difference and prevent endangered species from going extinct. It’s the same hope we experienced in 2010 when our very first patient, Stinky, was found healthy and thriving off the coast of Georgia.

We are so grateful to the Zucker family and our community of donors and members who have made this experience possible. We look forward to sharing Zucker Family Sea Turtle Recovery with you in this issue, and soon, in person.

Kevin Mills, President and CEO

Leading the way to connect people with water, wildlife and wild places.

The South Carolina Aquarium is a 501(c)(3) not-for-profit organization and relies on the generosity of individuals, foundations and corporations.

To help support the South Carolina Aquarium, contact us at (843) 579-8595 or advancement@scaquarium.org.

Aquarium News

Take the Plastic Challenge

Plastic pollution is one of the most pressing issues facing our oceans today. The U.S. only recycles nine percent of the plastic it uses, and worldwide more than 8 million metric tons of plastic enter the ocean each year. Solving the problem requires the effort of everyone! Luckily, there are simple steps we can all take to avoid single-use plastics and prevent plastic waste from entering the ocean.

We invite you to join us in taking a two-week Plastic Challenge. Starting in mid-July, we will send you a daily email each morning with a tip to reduce your dependence on plastic. How much of an impact do you think we will make together?

If you accept the challenge, visit scaquarium.org/plastic-challenge to learn more and sign up!

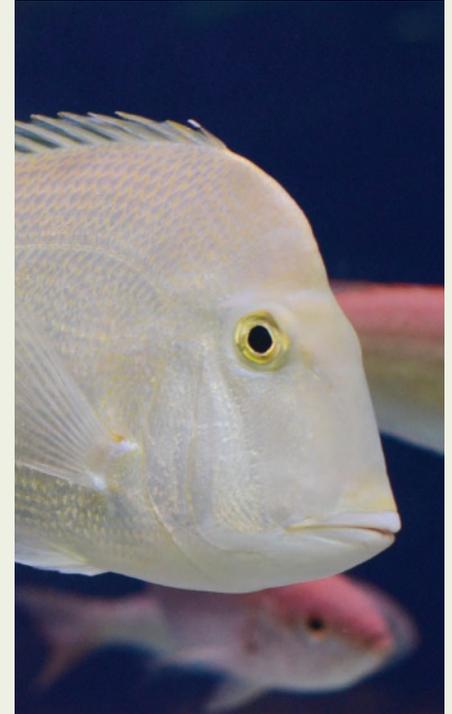

Shark Shallows Becomes The Shallows

Cownose rays and southern stingrays are the stars of our revamped exhibit, now entitled The Shallows.

Beginning last year, we treated the water in Shark Shallows with copper to eliminate a naturally occurring parasite. Now that the copper treatment is complete, we chose to focus on rays in the exhibit going forward to create a fun, relaxed experience for our guests and to provide more creative enrichment options for the animals. We're also exploring new opportunities for guests to interact with the rays.

We thank you for your patience and support as we continue to develop The Shallows! Read more at scaquarium.org/the-shallows-update.

Balanced Ocean Exhibit

Reel in a Good Catch at our recently added exhibit, Balanced Ocean, in the Coast gallery near the lionfish tank. Following the release of the juvenile sea turtle that previously occupied this tank, we gave the space a makeover. The new exhibit presents sustainable seafood in a fun and simple way, and makes choosing sustainable seafood less daunting for people of all ages.

The Balanced Ocean tank now displays many species of fish that fishermen can harvest responsibly in South Carolina. And in the exhibit's interactive area, you can practice your angling skills to "catch" a sustainable fish and see if it meets the requirements to be a keeper!

What's Happening

AQUARIUM AFTER HOURS

MAY 18: May-ting Season
JUNE 15: Tacos with Salsa
JULY 20: Southern Block Party
AUGUST 17: Endless Summer

5 – 10 p.m.

We've extended our operating hours to 10 p.m. on the third Thursday of each month this summer, adding themed activities and programs geared toward adults. Enjoy drinks from the cash bar and dinner from visiting food trucks as you experience the Aquarium at night. Free admission for members.

ZUCKER FAMILY SEA TURTLE RECOVERY™ MEMBER PREVIEW

MAY 25
6:30 – 8 p.m.

Be among the first to see the new exhibit that everyone's talking about! Visit the sea turtle patients in their new tanks, test the interactive triage and operating stations, and get a glimpse at the Aquarium's new, state-of-the-art medical facility.

Light refreshments will be served, and reservations are required. To reserve, call (843) 579-8518.

WORLD TURTLE CELEBRATION AND GRAND OPENING OF ZUCKER FAMILY SEA TURTLE RECOVERY™

MAY 27–28

This year, we're going all out to celebrate turtles with a brand new experience dedicated to these riveting reptiles! Local turtle team volunteers will be stationed at the Aquarium throughout the weekend to share their experience helping sea turtles in the wild and to answer your questions. Behind-the-scenes tours of the basement Sea Turtle Hospital will be available at 11 a.m., noon, 1 p.m. and 2 p.m. each day. Join the festivities as our newest exhibit opens to the public and we embark on a bold journey to save sea turtles.

WORLD OCEANS DAY

JUNE 8

Taking action to protect the ocean is vital to creating a healthy and sustainable environment for future generations because no matter where you live, everyone's health directly depends on a clean, productive ocean. Join us to learn how to protect one of the planet's most valuable resources, our oceans. Together we can make a huge impact on the health of the planet.

CRABBING CLINIC

JUNE 10

10 a.m. – noon

Pitt Street Bridge, Mount Pleasant

Join us for a crabbing clinic! In addition to learning about crabbing techniques, get the scoop on crab biology and how to have less impact while crabbing. \$10 per member. Reservations required; to reserve, call (843) 579-8518.

SEINING PROGRAMS

JUNE 15

6 - 7:30 p.m.

Sullivan's Island

AUGUST 10

6 - 7:30 p.m.

Daniel Island

JUNE 28

6 - 7:30 p.m.

Daniel Island

AUGUST 24

(ADULTS ONLY)

6 - 7:30 p.m.

Sullivan's Island

JULY 13

6 - 7:30 p.m.

Folly Beach

SEPTEMBER 16

10 - 11:30 a.m.

Folly Beach

JULY 27

6 - 7:30 p.m.

Sullivan's Island

A member favorite! Assist Aquarium staff as we search the sand and water for aquatic creatures. We'll drag a seine through the surf to find fish, crabs and maybe even a small shark. Educators will give you a glimpse into the fascinating lives of fish, mollusks and other beach dwellers as we walk along. Tickets are \$10; reservations required. To reserve, call (843) 579-8518.

There's always more to explore

SCAQUARIUM.ORG/CALENDAR

MEMBER MOVIE NIGHT

JUNE 26

6:30 – 9 p.m.

Join us for a special evening to enjoy Finding Dory in the Great Ocean Tank Gallery. Bring a pillow and watch a family-friendly film with your marine friends. Doors open at 6:30 p.m., and the movie will begin promptly at 7 p.m. Free for members. Reservations required; to reserve, call (843) 579-8518.

SEA STARS AND STRIPES

JULY 4

7 – 10 p.m.

Spend your Fourth of July at the Aquarium for fins, fireworks and fun on the harbor! Watch a spectacular fireworks show from the best view in Charleston, and cool down inside as you visit our animals. Tickets include a delicious, sustainable Lowcountry boil dinner plus beer and wine. Visit scaquarium.org to get yours!

DISCOVERY TRAWL

JULY 14

10 - 11:30 a.m. or 12:30 – 2 p.m.

Take a one-of-a-kind boat tour in partnership with the South Carolina Department of Natural Resources (SCDNR). We'll embark on SCDNR's *Educational Vessel Discovery* and explore the wildlife in the Aquarium's "backyard" by trawling in the Charleston Harbor. Ages 10 and up. Tickets \$15. Reservations required; to reserve, call (843) 579-8518.

TADPOLE EXPLORERS

JULY 15

8 – 9 a.m.

Parents and children alike love to explore the Aquarium in the morning! Our 1- to 3-year-old friends can explore stations including building blocks, crafts and animal encounters, and have the Aquarium all to themselves before the crowds arrive. Snacks, coffee and muffins will be provided. \$10 per member child; two adults free per child. Reservations required; to reserve, call (843) 579-8518.

SHARK WEEK

JULY 8 – 15

Find fun shark activities around every corner as we celebrate the ocean's apex predator. Enjoy special dive shows, educational stations and photo opportunities centered on sharks. Shark Week activities are free with membership.

JUMPBUNCH

AUGUST 1

10 – 10:30 a.m.

Let your little ones get their sillies out in a fun setting. Jump, dance, wiggle, skip, play and have fun to music. Recommended for ages 18 months to 4 years. Free for members. Reservations required; to reserve, call (843) 579-8518.

DANCE MOVES

AUGUST 10

10 – 10:30 a.m.

A fun and energetic class from Dance Moves of Charleston! Explore basic ballet moves, warm-ups, stretches, movements across the floor, jumping and turning. Girls and boys ages 2-6 are welcome. Comfortable clothing or dance attire recommended. Free for members. Reservations required; to reserve, call (843) 579-8518.

Zucker Family Sea Turtle Recovery™ Comes to Life

COUNTING DOWN THE FINAL
DAYS UNTIL THE OPENING OF OUR
BIGGEST UNDERTAKING YET, WE
WATCH WITH EXCITEMENT AS THE
FINAL TOUCHES COME INTO PLACE.

Signs are hung, lighting levels are adjusted, and the settling dust from construction is swept. The sea turtle patients have already moved into their tanks, unaware of their pristine new surroundings. Zucker Family Sea Turtle Recovery™ will soon be open to the public!

This new experience is far from an ordinary Aquarium display. Sea Turtle Recovery (for short) brings the day-to-day operations of our Sea Turtle Hospital into full view on the first floor. For 16 years, these activities have been the daily routine for a dedicated team of staff and volunteers working out of our windowless, converted basement. And each year, the space has become more crowded as an even greater number of turtles are admitted in need

of our help. It's time to shed some light on this awe-inspiring program.

That's precisely what makes Sea Turtle Recovery so special—it's both a hospital and an exhibit, making the real-life rehabilitation of sick and injured sea turtles visible to every guest that visits the Aquarium.

But it doesn't stop there. Interactive stations further enable you to learn the causes of sea turtle strandings and to practice diagnosing mock patients. Tablets referencing each patient share that turtle's story with you and detail its progress. A classroom and theater provide a glimpse into what happens before and after a turtle's time in Sea Turtle Recovery.

TAKE A CLOSER LOOK AT WHAT TO EXPECT WHEN ZUCKER FAMILY SEA TURTLE RECOVERY™ OPENS ON MAY 27

1

1. UPGRADED TANKS

The opening of Sea Turtle Recovery nearly doubles our patient capacity. Not only are we able to help more turtles, but we also have adequate space to properly treat large turtles like adult loggerheads, which can grow to more than 300 pounds.

The floor of the tank area is elevated about 2 feet off the ground, which not only helps you come face-to-face with the patients, but also provides space for the intricate plumbing and water filtration systems that support Sea Turtle Recovery. You can see the turtles clearly through the one-way glass, but they can't see you—helping to ensure a minimum of stress as they recover.

A special “endless pool” with a continuous current provides exercise and therapy opportunities for turtles as they approach their release back into the wild. Sea Turtle Recovery is one of the few sea turtle rehabilitation facilities in the U.S. to implement this technology.

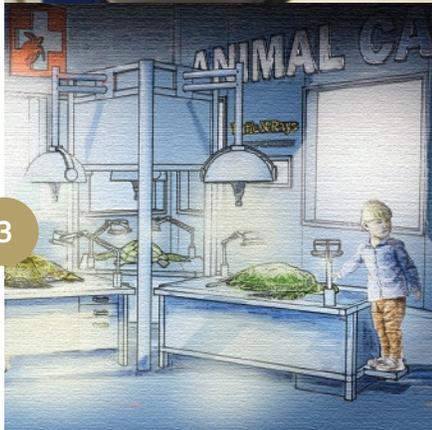

2

2. IMPROVED MEDICAL FACILITY

Behind the walls of Sea Turtle Recovery lies a fully renovated medical facility that enables our experts to provide world-class animal care.

A new CT scanner provides superior 3D diagnostic images, helping our veterinary staff see not just a turtle's skeleton but also its internal organs to diagnose conditions in the lungs or intestines. This scanner is of the highest resolution currently housed in a marine science care center or aquarium. Having this technology on-site prevents us from having to transport our patients to outside offices for scans and helps to keep their stress at a minimum.

3

A modern operating room is the perfect space for our veterinarian to perform surgical procedures, benefiting our turtle patients as well as the Aquarium's permanent animal residents. At times, you will even see a medical operation in progress through the room's viewing window!

3. INTERACTIVE MOCK MEDICAL STATIONS

Augmented reality technology enables you to test your veterinary skills with mock sea turtle patients. Follow the same steps that our triage team does, taking vital signs and diagnosing the condition of synthetic turtles modeled after the species and injuries that we encounter most frequently here in our hospital.

At another station, practice your talent at the operating table! Learn about eight of the most common ailments that we come across in the hospital, and discover how we treat them with hands-on activities.

4. CLASSROOM & OBJECT THEATER

A 40-seat classroom and theater space hosts daily programs and features video expanding upon sea turtles' journey from rescue to rehabilitation to release. To immerse viewers in the sea turtle's point of view, the room itself comes to life, using props, light and sound to underscore the context of the video.

4

MEET THE SEA TURTLE CARE CENTER™ TEAM

DR. SHANE BOYLAN
McNair Family Chief Veterinarian

"I'm most excited about having our own CT machine. It will make it possible to better evaluate the turtles' conditions, and it'll cause them less stress."

Shane provides day-to-day guidance for the health and welfare of not only the sea turtle patients, but every animal in the Aquarium's collection! He loves giving the animals the best quality of life and helping those that are sick or injured. He diagnoses turtle patients during triage, monitors their nutrition, medicine and surgical procedures, and approves their release when they are healthy enough to survive in the wild. Shane serves on the Executive Board of the American Association of Fish Veterinarians and is the recipient of several awards, including the Proficiency in Zoological Medicine Award from North Carolina State University.

WILLOW MELAMET
Sea Turtle Care Center™ Manager

"The most exciting part of Sea Turtle Recovery, for me, is giving all our guests the chance to see and learn about these sick and injured turtles. I hope having that up-close and personal interaction will inspire more people to care about conservation, and take personal action to minimize their impact on the ocean ecosystem."

Willow keeps the Sea Turtle Care Center running like a well-oiled machine. She oversees the feeding and medication of each turtle, taking each one's condition and unique needs into consideration, and works with our team of educators to design the daily programs interpreting the activities going on in Sea Turtle Recovery. She began her career with the South Carolina Aquarium as an intern in 2011 and spent time as a wildlife rehabilitator at the Clinic for the Rehabilitation of Wildlife in Sanibel, Florida before returning to Charleston to work in our Sea Turtle Hospital.

KELLY THORVALSON
Conservation Programs Manager

"I'm beyond excited that every detail in Zucker Family Sea Turtle Recovery is designed with the best interest of our patients in mind. From minimal sound levels and lighting, to medical equipment and tank size, this hospital is first class!"

Kelly started volunteering for the Aquarium in 1997 and joined the staff as an aquarist in 1999, before the Aquarium even opened to the public. From 2004 to 2016, she managed the Sea Turtle Care Center, developing the program into what it is today. She now helps to advance all of the Aquarium's conservation programs, including Good Catch, the Resilience Initiative for Coastal Education and initiatives to combat plastic pollution. Kelly is the recipient of several awards, including a Women of Distinction Award in Environmental Education from the Girl Scouts of Eastern South Carolina in 2010 and the Victor Samra Leadership Award in 2012.

MCNAIR CENTER FOR SEA TURTLE RESEARCH AND CONSERVATION

IMPROVING THE WELLBEING OF SEA TURTLES EVERYWHERE

With Zucker Family Sea Turtle Recovery™, we're ensuring that we provide the best care and rehabilitation for sea turtles while they're at the Aquarium, but we know their journey doesn't end here. That's why we've also committed ourselves to protecting sea turtles worldwide through the work of the McNair Center for Sea Turtle Research and Conservation.

The new McNair Center will serve as the Aquarium's in-house research facility especially for sea turtle knowledge. Although Sea Turtle Recovery is new, we have been rehabilitating turtles since 2000, providing us with more than 16 years of data to analyze for trends about sea turtle health. We'll take what we've learned from our turtle

patients' injuries and illnesses, and present it to the scientific community so that researchers all over the world can benefit.

The McNair Center will also enable us to partner with additional groups that work to help sea turtles, including colleges, veterinary offices, public research agencies and other turtle rescue facilities. Working through the McNair Center, we'll publish research about the healing techniques used here at the South Carolina Aquarium, like our new exercise pool and CT scanner. By sharing our findings, we'll empower our partners to improve the wellbeing of sea turtles everywhere.

TURTLE TEAMS MAKING A DIFFERENCE

It takes a village to save sea turtles – or, in South Carolina’s case, it takes 22 villages! That’s how many coastal communities have Turtle Teams, groups of trained volunteers who work with the South Carolina Department of Natural Resources (SCDNR) to protect sea turtles during nesting season.

Volunteering with a Turtle Team is rewarding, but it’s not always glamorous! These volunteers monitor the beaches every day for new nests and stranded turtles. Some of the areas they monitor, like Cape Romain National Wildlife Refuge, are difficult to reach and full of mosquitoes. Regardless of whether the day is

sweltering with heat or pouring down rain, the volunteers mobilize to protect sea turtles.

One critical duty of the Turtle Teams is to identify nests that are laid too far down the beach to withstand the rising tides and therefore are at risk of being overwashed. These nests must be unearthed and relocated at higher elevation to protect the developing turtle eggs. For threatened species like the loggerhead, our state reptile, the success of every hatchling counts.

The turtle teams are also critical to locate turtles that need the Aquarium’s care. When the volunteers come

across a sick or injured turtle, they contact SCDNR, the state agency that is authorized to respond to sea turtle strandings. Because the Aquarium is the only dedicated hospital for sea turtles in our state, almost all of these turtles are then transported here for further care and treatment.

RETURNING HOME: SEA TURTLE RELEASES

Seeing a rehabilitated turtle be released back into the wild is one of the most rewarding moments for everyone involved in the Sea Turtle Care Center. Sea turtle releases are a remarkable sight and represent our role in helping to ensure the future of these ancient ocean creatures. Releases are rewarding not only for those who have helped the turtles directly, but for the entire community. If you would like to attend a public sea turtle release or learn more about the release process, here are some fast facts:

#1 In order to be released, a turtle must be medically cleared by our veterinarian and Sea Turtle Care Center medical staff.

#2 Per federal guidelines, there is a very short turnaround time for a turtle to be released once medically cleared. Our team works with SCDNR to determine the best location, date and time for release.

#3 Release details are posted on the South Carolina Aquarium's Facebook and Twitter pages.

#4 Local releases most often occur in the late spring and summer when ocean temperatures are warm enough for the turtles, so make sure to check for release announcements during these times of year!

#5 To receive priority email notification prior to all public sea turtle releases and a special viewing lane, become a Loggerhead Adoptive Parent at the \$100 level. Your support helps provide our animals with expert care, daily food and vitamins, and opportunities for enrichment. Learn more at scaquarium.org/adopt.

IN GRATITUDE

We wouldn't be approaching this landmark exhibit premiere if not for the generous support of lead donors Mrs. Anita G. Zucker and Mr. Jonathan M. Zucker. The Zucker family is a longtime supporter of the South Carolina Aquarium and recognized the need to expand the Sea Turtle Hospital as an especially important cause. Their visionary leadership, along with the foresight and generosity of each donor to our Watershed campaign, will make a tremendous impact on sea turtle populations for years to come.

"My family has been inspired by the Aquarium's sea turtle rescue program since its earliest days. Investing in this transformational project, knowing that it carries the promise of igniting inspiration through STEM education as well as producing groundbreaking research, is deeply meaningful to us."

—Jonathan M. Zucker

What's Your Story?

*BRUCE
HECKER*

*A SPECIAL ENCOUNTER
WITH A NESTING
LOGGERHEAD SEA
TURTLE REINFORCED
BRUCE'S COMMITMENT
TO CONSERVATION.*

In 1997, the new South Carolina Aquarium was just getting started; I was one of six people employed at the time, sharing office space on Hasell Street. As we planned the exhibits and animals for the Aquarium, my colleagues and I traveled throughout the state, observing the various ecosystems we'd be representing. One excursion took us on an overnight camping trip to Botany Bay with a representative from the South Carolina Department of Natural Resources to experience the state's coastal islands and its sea turtle nesting season.

We ferried our families and ourselves to the island by boat, along with tents and equipment, setting up camp oceanside among the dunes. After spending the afternoon walking through the untouched maritime forest, we began the evening patrolling the beach, hoping to see turtle crawls. Around midnight, a 300-pound loggerhead quietly emerged from the waves and lumbered her way up past the tideline, settling behind low beach shrubs. Standing back, we watched as she dug her nest and deposited hundreds of eggs. Afterwards, she dragged herself down to the shoreline, finally disappearing into the dark water.

Back at camp, we were exhilarated, feeling privileged to have witnessed this. We stayed up most of the night, discussing how to convey what we had just seen through the Aquarium's guest experience. We left the next day feeling closer to each other and sharing a new sense of commitment.

Two months later, the six of us made another overnight trip to the same spot and watched with excitement as a nest erupted under the full moon and a stream of hatchlings flopped and tumbled their way into the ocean. It was magical!

What's your story?

THE WATERSHED CAMPAIGN
Come together at
scaquarium.org/watershed

The Watershed Campaign:

A SEA TURTLE'S JOURNEY STARTS WITH YOU

INSPIRED TO DO MORE?

The South Carolina Aquarium welcomes Sea Turtle Ambassadors like you whose creative fundraising efforts provide critical support for the rehabilitation and release of these animals. Six out of the seven species of sea turtles live in United States waters, and they are all endangered or threatened.

Dedicated ambassadors help to raise awareness and funds for the South Carolina Aquarium Sea Turtle Care Center™. Successful efforts include donations in lieu of birthday presents, school or class read-a-thons and more. Together, we have rehabilitated and released more than 200 sea turtles.

TO LEARN MORE ABOUT WHAT YOU CAN DO OR TO BECOME A SEA TURTLE AMBASSADOR, visit scaquarium.org/third-party-fundraising or call Caitlin Cash at (843) 579-8541.

Protect Sea Turtles During Nesting Season

START

Sea turtle nesting season spans from May to October. Help this little hatchling find his way to safety in the Sargasso Sea while discovering how you can protect sea turtles.

2. Avoid plastic bags. Sea turtles can mistake them for jellyfish. Choose reusable bags instead!

2

4

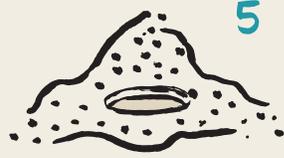

4. If you, family or friends see a nesting sea turtle or sea turtle hatchlings, keep your distance and don't bother them.

1. Knock down sandcastles before dusk so hatchlings can reach the ocean.

3. Lights from streets and houses can be disorienting to newly hatched sea turtles. Turn off lights that can be seen from the beach.

If you find a sick, injured or dead sea turtle, contact the South Carolina Department of Natural Resources sea turtle hotline at (800) 922-5431.

5. Fill holes before dusk so hatchlings have a clear path to the ocean.

YOU'VE REACHED THE SARGASSO SEA!

6. Remember to take belongings and trash with you when you leave the beach.
