

Exhibit Cleaning

Revised December 5, 2012

Arnold Postell

Senior Biologist / Dive Safety Officer

- Work: (843) 579-8536
- Email: apostell@scaquarium.org

It is the mission of the South Carolina Aquarium (SCA) Dive Team to provide excellence in animal care and husbandry, to actively support both the educational and conservation endeavors of the SCA, and to provide a memorable, positive guest experience to all those who visit our facility.

Training Schedule

- Power Point Presentation
- Quiz
- 2 Cleaning Dives
 - > **Supervised by Team Leader or Designee**

Windows

Dry Side

- Cleaned every morning.
- Use clean rag and Briljanize
- Look through window for algae spots
 - > **Easier to see from dry side than in exhibit**

Wet Side

- When diving use doodlebug pad only!
- Suction cups are available to help hold position
- Careful not to scratch acrylic
- Careful not to hit window with your cylinder

Cleaning tools -Windows

Doodlebug

Suction cup

Rockwork

- Air compressor can be used for detailed cleaning
- Use only brushes approved by DSO
- Clips are provided on every BCD
- Clip brushes to BCD when not being used
 - > **Don't put these in the BCD pockets**

Cleaning tools -Rockwork

Brushes

Compressor

Vacuuming

- Lower the vacuum hose into the water
- Plates are stored in the lower cave
- Cover the fibergrate at the bottom of the exhibit with the plates
- Connect the hose to the plate with the butterfly clamp
- Vacuuming is to be done during the first dive of the day
 - > **Aesthetics and pump flow**

Vacuuming (Continued)

Hose

Plates

Important Rules

- Anything that goes into the exhibit must come out
- Watch air consumption
- Look up and check on your dive buddies!
- Report any exhibit issues to DSO or husbandry immediately

THANK YOU!

- The cleaning efforts of the SCA dive team allow our guests have a positive experience by ensuring our exhibits look wonderful all the time.
