PROTECT WHAT YOU LOVE
Inspire a New Generation of Conservationists
Spark enthusiasm for conservation of the natural world in your students with a visit to the South Carolina Aquarium. As a class, take an educational journey through South Carolina’s most diverse habitats while learning what you can do to protect them. From start to finish, hands-on activities will support state standards and inspire STEM education. It’s more than just a field trip – it’s an opportunity to discover the wonder of water, wildlife and wild places.
Support your classroom lessons with our online curriculum designed to complement your trip to the South Carolina Aquarium! Numerous activities and worksheets for all grade levels are available at curriculum.scaquarium.org. These resources align with South Carolina standards and work in tandem with the diverse habitats, geographical regions and animals found at the South Carolina Aquarium.
At the Aquarium, learning is ongoing with our standards-based Teacher Resource Kits. Multiple age-appropriate options are available to enhance your students’ experience:

• Send your students on a **Scavenger Hunt** to engage with the Aquarium’s exhibits and diverse habitats and geographical regions

• Utilize your students’ critical thinking and sensory skills to learn about South Carolina’s wildlife and wild places with artifacts organized in **Discovery Bins**

• Dive deeper into learning with **Exhibit Activities** tailored to connect your students to what they’re experiencing in a singular space
Let the Aquarium Come to You
Our Education Outreach program brings interactive, hands-on learning to your facility. Each standards-based program includes engaging activities, wildlife artifacts and live animals. We travel all over the state inspiring all ages to care for water, wildlife and wild places. Learn more at scaquarium.org/educationoutreach.

Become Citizen Scientists
Your class can be part of the solution to reduce plastic pollution! Plan a litter or beach sweep with your school or community and contribute your data in the Litter-Free Digital Journal, a project in the South Carolina Aquarium citizen science app. Learn more at scaquarium.org/citizenscience.
Virtual Field Trips
Visit the Aquarium from the comfort of your classroom by booking a Virtual Field Trip! These engaging programs are highly customizable to fit class curriculum and can be tailored to focus on specific student interests, from sea turtles to otters to animal enrichment and more! Visit scaquarium.org/virtualfieldtrips.

Live Virtual Visits and Turtle Talks
On Tuesdays at 10 a.m on Facebook, tune into live Virtual Visits hosted by our educators and featuring a surprise animal or Aquarium exhibit. Then on Wednesdays at 10 a.m., enjoy a live Turtle Talk hosted by our sea turtle biologists and spotlighting a sea turtle patient. Check out our Facebook page at facebook.com/scaquarium.

*Schedule is subject to change*
Visit South Carolina's only working sea turtle hospital, located on our first floor and included in group admission. Learn how we care for sick and injured sea turtles. Meet current patients and follow their journey home, from rescue and rehabilitation to release. Learn more at scaquarium.org/seaturtlecarecenter

Your students can:

• Connect with real sea turtles and learn their unique stories in Zucker Family Sea Turtle Recovery™
• Glimpse our modern medical facility with state-of-the-art equipment
• Practice your veterinary skills at interactive mock medical stations
Plan Your Class Experience

Encourage your students to care about conservation with a field trip to the South Carolina Aquarium.

- See how we care for sick and injured sea turtles in Zucker Family Sea Turtle Recovery™
- Bring STEM learning to life with activities aligned with state curriculum standards
- Learn about threatened and endangered species
- Discover how you can protect animals and their habitats
